Claims 1-24 are presented for examination.

The amendments and remarks filed on February 28, 2008 have been received and entered.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 11-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The instant specification fails to recite the phrase "in an amount sufficient to improve the level of L-ascorbic acid in the eye". Such phrase is considered to be new matter.

Claims 1-10 and 24 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Nelson et al. (US 4,490,389) in view of Fritsch et al. (US 5,445,827) for the reasons set forth on pages 2-5 of the office action of November 5, 2007.

Applicant's arguments and remarks have been carefully considered, and are considered to be persuasive regarding claims 11-23. Applicant's arguments regarding the differences in the PH of the Prior art and the claimed invention have been carefully considered, but are not deemed to be persuasive. Applicant is reminded that the lower

Art Unit: 1612

limit of Nelson et al. is very close to the higher limit of the claimed invention.

Furthermore, the determination of optimum PH is considered to be within the skill of the artisan in the absence of evidence to the contrary.
